

Innovation is **Built** on **Innovation**

Experience ZLD 3.0

How Agile is your Business?

In today's world, businesses face rapid environmental and technological changes that can be as beneficial as threatening. Continual innovation may be the most powerful and competitive advantage for a business. The ability to rapidly adapt to change in productive and cost-effective ways may be the single most important feature any business needs to survive critical times.

Strong Partnership

Continual innovation not only depends on how sensitive and adaptable your business is, it depends on the alliances you establish with strong partners who understand that agility can only be achieved along parallel lines, improving their own offering to you.

The best things in life are FREE

The new major firmware release ZLD 3.0 is available for the existing ZyWALL USG series and can be downloaded from ZyXEL's website free of charge.

Together, we are stronger.

The future is here now

With more and more mobile workers who are multi-screening attempting to connect to the network, 2011 saw a major increase in security threats. Fighting malware has become a priority in the security arena. The new Zywall ZLD 3.0 firmware upgrade will give you powerful weapons to fight these threats. New Anti-Spam and Content Filtering services powered by the leading security service provider Commtouch add additional strength to the unified threat solution of the USG series.

Coupled with IPv6 capabilities and many other features such as Easy VPN or infrastructure enhancements ZyXEL's USG offer you and your customers the ultimate network protection.

ZyXEL USG Benefits

- > **Excellent Performance**
- > **Network protection at its best**
- > **IPv6 ready**
- > **Anti-Spam 2.0 and the new Commtouch Content**
- > **Flexible solutions with low operating expenses**
- > **Complimentary local technical support**
- > **ZyXEL Lifetime care**

ZyXEL USGs – the smart choice for today's business

Excellent Performance

The new firmware boosts the performance of the ZyWALL series significantly by using the Fast-path technology to support both single-core and multi-core HW platforms – with up to 30% growth over the previous v2.2x. These significant performance enhancements help cope with the ever demanding throughput requirements, so that your network is safe and fast at the same time.

Network protection at its best

Today more than ever it is crucial to fight network threats with a state-of-the-art security deployment. ZyXEL's ZyWALL USG series provide a new level of security features with the v3.0 release helping you to protect networks like never before.

IPv6 Ready

IPv6 is designed to solve the problems of IPv4 exhaustion and is already increasingly required in worldwide deployment. With the new 3.0 firmware, ZyXEL launches the first phase of the implementation of the IPv6 protocol with focus on Dual stack, 6rd & 6to4 transition and host, router and firewall functionality.

Fight the malware battle – Anti-Spam 2.0 and the new Commtouch Content Filter

In addition to the current complimentary Anti-Spam offering, the 3.0 firmware introduces an industry leading Anti-Spam solution from Commtouch as a UTM service in our platform. This Anti Spam solution offers advanced mechanisms to grant high performance and excellent detection rates. Additionally, Commtouch's Content Filter is provided as an optional service*.

Easy VPN and many other enhancements

The new v3.0 firmware comes with numerous further advantages such as the Easy VPN functionality or complete DHCP options. The firmware is available free of charge from ZyXEL's Homepage from 2012.
